cat. no. 102.102.15

Partition panels

GRAPFIC PANEL

The graphic panel is a state-of-the-art design solution, a part of the partition system for the construction of clean rooms and workplaces with the maximum sterility, hygiene, easy maintenance and sanitation.
The panel is suitable for application in healthcare facilities (operating theatres, recovery rooms, intensive care units, various departments and corridors), pharmacy, engineering, electrical and chemical industries.

PRODUCT DESCRIPTION

- A sandwich type panel with the faceplate made of safety glass, HPL or Acrovyn®
- Optional integration into the BLOCK partition system

ADVANTAGES

- As the graphic panel is flush with the build-out, it does not compromise the appearance of clean rooms.
- Easy maintenance, complies with the stringent hygienic requirements.
- Acrovyn® is resistant to diluted acids, alkaloids and salt solutions, mineral and vegetable oils, disinfectants, alcohols, diluents, fatty acids, etc. A complete table of chemical resistance is available upon request.

- Attractive design with optional printing decoration of your choice.
- HPL - High-pressure laminate impregnated with resin providing high resistance to wear, scratches, impacts and water, thus reducing maintenance and repair costs.
- Acrovyn® is characterized by low flammability. It is quenched once the flame source is removed.
- Perfect UV stability, colourfastness.
